A. SAMPLE PHS 398 APPLICATION AND 194 TRANSACTION SET.....		57

1. Purpose and Business Overview

1.1 Document Purpose

The purpose of the “NIH X12 194 Implementation Guide for the Competing Award Process” is to provide standardized data requirements and content to all users interested in submitting competitive grant application data to the National Institutes of Health (NIH) via the X12 194 (Grant or Assistance Application) transaction set. The guide provides a detailed explanation of the transaction set by defining uniform data content and identifying valid code tables. This will aid users in the successful encoding of grant application data from a proprietary format to the X12 194 standards required by NIH.

Expected users of this implementation guide include NIH grantee organizations and third party vendors that conduct business with NIH on behalf of a grantee organization (i.e., grantee organization agents).

1.2 Version and Release

The “NIH X12 194 Implementation Guide for the Competing Award Process” is based on the Accredited Standards Committee (ASC) X12 standards, approved for publication in December of 1997, referred to as Version 4 Release 1 (004010).

1.3 Business Usage and Definition

NIH has deployed a pilot EDI system to receive and validate competitive grant application data. Grantee organizations (or their agents) use a subset of the 194 to encode the data for transmission to this pilot system.

The NIH EDI pilot system is being deployed as a phased implementation. Phase one, which is currently underway, accepts test data for the following sections of the grant application: face page, abstract, description of performance sites and key personnel, research plan specific aims, and the budget. Phase two, for which this manual is written, is an extension of phase one, supporting the entire competitive application.

Phase two has several constraints. First, as with phase one, only test data is accepted. Second, only competing continuations and revisions are supported (i.e., no supplements or new applications). Last, only single project research applications are supported. This means that applications for Research Career Awards, Research Training Grants, or Construction Grants, as well as applications with subprojects, consortium arrangements, or foreign components will not be accepted during phase two.

1.5 Terms and Abbreviations

194	X12 Grant or Assistance Application
398	NIH Grant Application
AO	Administrative Officer
ASC	Accredited Standards Committee
DUNS	Data Universal Numbering System
EDI	Electronic Data Interchange
EIN	Entity Identification Number
GUIDe	Government User Identifier
IACUC	Institutional Animal Care and Use Committee
IC	Implementation Convention
IPF	Institutional Profile
IRB	Institutional Review Board
NIH	National Institutes of Health
OPF	Organizational Profile
OS	Other Support
PHS	Public Health Service
PI	Principal Investigator
PPF	Professional Profile
RFA	Request For Application
SO	Signing Official
SSN	Social Security Number

1.6 Organization of Document

This document, the “NIH X12 194 Implementation Guide for the Competing Award Process”, contains three major sections. Section 1 introduces the manual. Section 2 provides a data overview, and section 3 presents the implementation guidelines for the 194 transaction set. This document also contains one appendix, which provides a sample PHS 398 application and associated X12 194 transaction set.

1.7 How to Use This Document

This manual is written for the technical user who understands EDI terms and concepts. It cannot be used as a standalone document; it must be used in conjunction with the 194 Federal Implementation Conventions (ICs) [1], and the PHS 398 Application Kit [2].

This document presents, in tabular form, the 194 data segments used in phase two of the NIH EDI pilot. Each table contains the complete set of data elements comprising the segment, as well as all data codes and qualifiers processed by NIH. Each table also contains any implementation notes specific to NIH requirements.

This guide specifies the usage for each data segment and data element applicable to phase two of the EDI pilot. The definitions for the usage codes are provided below.

Usage	Expansion	Meaning
R	Required	This item must be used to be compliant with this guide.
O	Optional	The presence of this item is at the option of the sender.
C	Conditional	If the first element specified in the condition is present, then all other elements must be present.
N/U	Not Used	This item should not be used when complying with this guide.

1.8 Respondent Burden

This information collection activity is linked to the *U.S. Department of Health and Human Services, Public Health Service, Grant Application (PHS 398, Rev. 5/95)*. The PHS 398 form is approved through 02/28/2001, OMB No. 0925-0001.

The Public Health Service (PHS) estimates that it will take approximately 35 hours to complete this application for a regular research project grant. This estimate does not include time for development of the scientific plan. Items such as human subjects and vertebrate animals are cleared and accounted for separately, and are therefore also not part of the time estimate. An agency may not conduct or sponsor, and a person is not required to respond to, a collection of information unless it displays a current valid OMB control number. If you have any comments regarding this burden estimate or any other aspect of this collect of information, including suggestions for reducing this burden, send comments to: NIH, Project Clearance office, 6701 Rockledge Drive, MSC 7730, Bethesda, MD 20892-7730, ATTN: PRA (0925-0001). **Do not send applications to this address.**

2. Data Overview

2.1 Information Flows

The transmission of competitive grant application data to NIH takes place as shown:

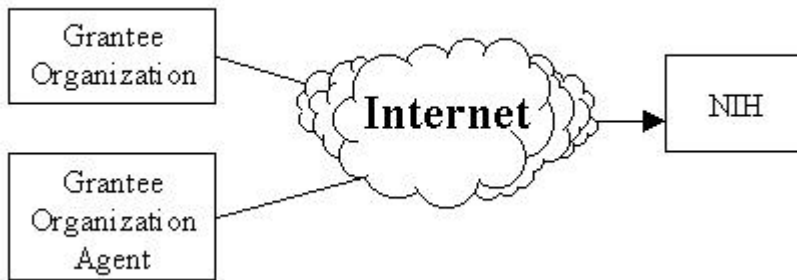

Figure 2.1. Competitive Grant Application Information Flow

2.2 Data Usage by Business Usage

The X12 194 is divided into two tables: Header and Detail.

- Table 1, the Header level, provides administrative data pertaining to the application, including the application type, how the research plan is submitted, information about the administrative and signing officials, and information about the applicant organization.
- Table 2, the Detail level, provides information pertaining to project dates and resources, personnel and other support, the budget, performance sites, assurances and certifications, and information about human subjects and vertebrate animals.

2.2.1 HL Loops

When specifying application data in Table 2, HL loops are used to define specific threads of information. Each HL loop is identified by an HL level code. This guide recognizes three HL level codes: Project (PC), Key Person (26), and Other Support (OS).

1. Project: This HL loop is used to provide project-related information, including dates, resources, budget data, performance sites, and information on human subjects and vertebrate animals.
2. Key Person: This HL loop is used to identify information about a key person, including active or pending Other Support.

3. **Other Support:** This HL loop is used to identify the Other Support associated with a key person, including other support dates, sources, percent effort, and description of the overlap. One iteration of this loop is required per Other Support project (active or pending).

X12 HL loop types are hierarchical in structure. The following diagram depicts the relationships between the three HL loop types supported in phase two of the NIH pilot.

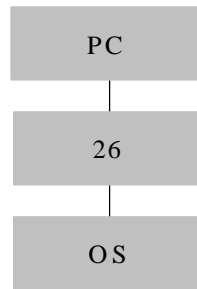

Figure 2-2. HL Loop Type Hierarchy

With each HL loop type, only certain segments can be specified. The following table lists the segments that comprise table 2 of the 194 transaction set, and for each segment (or set of related segments), which HL loop types support the segment (as defined by phase two of the NIH pilot).

194 Segment	PC	26	OS
QTY		✓	
DTM	✓		
PAM	✓		✓
NX1	✓		
YNQ	✓		
N9/L11/MTX	✓		
INX/K3	✓		
PPL/PD/PDD	✓		
LX/NM1-N4	✓	✓	✓
PER		✓	
DMG		✓	
EMS		✓	
N9/MTX	✓	✓	✓
DEG/FOS/N1		✓	

Table 2-1. HL Loop Segment Usage

2.2.2 Budget Category Code Hierarchy

The 194 permits a hierarchical specification of budget data. For example, salaries and fringe benefits are aggregated to calculate labor costs. Labor costs are aggregated with equipment costs, inpatient costs, outpatients costs (and others) to calculate total direct costs. Each cost is associated with a code.

The hierarchy of budget category codes supported by phase two of the NIH pilot is shown below.

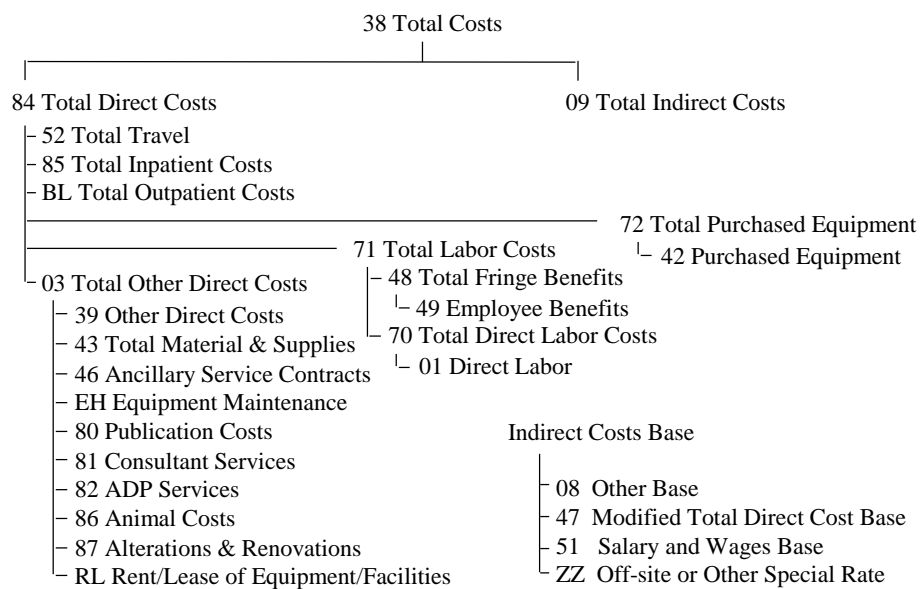

Figure 2-3. Budget Category Code Hierarchy

2.3 Data/Transaction Set Model with Usage Matrix

The following matrix identifies the PHS 398 items supported in the NIH EDI pilot. The matrix correlates 398 items with 194 data elements and 194 codes. The 194 codes are specified in parentheses.

2.4 Applications and Profiles

Grantee organizations and users must register with NIH before being referenced on an application. Once registered, the grantee organization maintains its Organizational Profile (OPF) and each user maintains a Professional Profile (PPF). When submitting grant application data to NIH via EDI, there are business rules that govern how information in the application affects the profiles. In general, grant application data elements:

- must match the registered profile values, or
- are stored as part of the application, but do not change the profile, or
- change the profile.

The specific business rules are described below. Note that not all the data elements listed are required to be present on an application.

2.4.1 Organizational Profile

With respect to the applicant organization, no organizational data submitted via EDI affects the OPF. The following grant application data elements *must* match OPF values registered with NIH. If not, the transaction is rejected.

- Institutional Profile (IPF) code
- DUNS number
- EIN

The following grant application data elements *should* match OPF values registered with NIH. If not, the transaction is accepted, but the dissimilar data elements are ignored, and an email message is returned to the grantee identifying the inconsistency(ies).

- organization name
- organization type
- congressional district
- department (for the PI)
- school or major subdivision (for the PI)

The following data elements are stored as part of the application, but do not change the OPF.

- address (street address, city, state, etc.)
- assurance and certification data

2.4.2 Professional Profile

NIH uses a Unique Person Algorithm (based on various PPF data elements) to uniquely identify key individuals on a grant application. If the algorithm *fails* (i.e., cannot uniquely identify an individual), the transaction is rejected. Note that failure to recognize even one key person causes the grant application to be rejected. If the algorithm succeeds (i.e., uniquely identifies an individual), PPF data elements are handled as follows.

The following grant application data elements *must* match PPF values registered with NIH. If not, the transaction is rejected.

- Government User Identifier (GUIDe)
- Social Security Number (SSN) – note that an invalid GUIDe or SSN will result in the algorithm failing. They are listed here only for completeness.

The following grant application data elements *should* match PPF values registered with NIH. If not, they are stored as part of the application (they do not change the PPF), but an email message is returned to the grantee identifying the inconsistency(ies).

- name
- date of birth
- gender
- race/ethnicity

The following data elements are stored as part of the application, but do not change the user's PPF.

- position title
- address (street address, city, state, etc.)
- contact data (phone, fax, email)
- degree (i.e., education)
- research and professional experience

Publications are handled as follows. Each publication specified in the grant application is compared to the PPF registered with NIH. If a match is found, the publication is stored as part of the application. If a match is not found,

- the publication is stored as part of the application
- the publication is added to the individual's PPF
- an email message is returned to the grantee identifying the PPF update.

2.5 General Processing Rules

NIH applies some general rules when processing data streams. The NIH processing rules for EDI transactions containing competing applications are as follows.

1. There are 194 data segments, data elements, and codes not supported by NIH. Any unsupported information included in the data stream is ignored.
2. This implementation guide restricts the length of certain data elements. If a data element exceeds an NIH length constraint, the data stream is rejected.
3. Some 194 data elements comprise multiple values (e.g., a person can have multiple position titles). For some of these data elements, NIH only permits a single value (e.g., NIH only allows a single title to be specified for a person). When this scenario arises, only one value is stored with the application. The grantee is notified via email of which value was accepted.

NIH requires the following HL loops to be present in the 194 transaction set: the Project Loop ("PC") and one iteration of the Key Person Loop ("26") for the PI. Within these two loops, NIH requires the following data elements. If any of these data elements are missing, the transaction is rejected.

2.6 ASCII Text

When submitting grant application data to NIH via EDI, grantee organizations encode the data using the 7-bit American Standard Code for Information Interchange (ASCII) bit pattern. This encoding scheme does not permit the representation of many foreign language characters (e.g., the Ä). This limitation is most apparent when specifying abstracts, project titles and publication titles containing special characters (e.g., mathematical characters). For the EDI pilot, NIH recommends providing a brief description of the special character. For example, use *delta* in lieu of δ , or use *small a, umlaut* in lieu of ä.

3. 194 Transaction Set

The X12 194 transaction set is used by grantee organizations (or their agents) to submit competitive grant application data to NIH. A single transmission of this transaction set shall be used to submit a single application. For phase two of the NIH EDI pilot, the submitted application shall contain test data.

N/U	PPL05	1401	Proposal Data Detail Identifier Code	O ID 1/3

3.23 PD Segment (2/190)

Table / Position: 2 / 190

Purpose: To describe the pricing basic input detail.

Notes:

1. *This Implementation Guide mandates the following method for specifying a labor category comprising multiple persons:*

- *Set PD08 to the numeric value of “1”, use PD09 to identify the labor category, and repeat this process for the total of persons in the labor category.*

If, for example, a labor category comprises six nurses: set PD08 to the numeric value of 1, set PD09 to the value of “NURSE”, and repeat this process for a total of six iterations.

2. *For individuals with different percentages over different periods (e.g., different level of effort for academic period verses summer period), use only one iteration of the PD loop and average the percentages for the individual.*

3. *All people specified for an application must be identified in the budget.*

4. *To specify Facilities and Administration Costs, set PD07 to the appropriate code that identifies the Indirect Cost Base (i.e., 08, 47, 51, or ZZ). Alternately, set PD07 to code 09 and specify the Indirect Cost Base in a separate iteration of the PD loop.*

Usage	Ref. Des.	Data Elmt	Name	Attributes

Appendix A. Sample PHS 398 Application and 194 Transaction Set

This appendix contains a sample PHS 398 application. The sample application is followed by the corresponding X12 194 transaction set.

The sample PHS 398 application contains fictitious information. Although the application data is *realistic* in format, it should not be used as guidance for completing a 398 application. The purpose of the sample application is to illustrate the relationship between 398 form data elements and X12 194 data elements.

Also, note that within the transaction set certain data elements are italic and bold. These data elements are mapped directly to fields in an NIH database.

Department of Health and Human Services Public Health Services Grant Application <i>Follow instructions carefully.</i> <i>Do not exceed character length restrictions indicated on sample.</i>		LEAVE BLANK—FOR PHS USE ONLY.

DESCRIPTION: State the application's broad, long-term objectives and specific aims, making reference to the health relatedness of the project. Describe concisely the research design and methods for achieving these goals. Avoid summaries of past accomplishments and the use of the first person. This abstract is meant to serve as a succinct and accurate description of the proposed work when separated from the application. If the application is funded, this description, as is, will become public information. Therefore, do not include proprietary/confidential information. **DO NOT EXCEED THE SPACE PROVIDED.**

This is where the abstract would go.

BIOGRAPHICAL SKETCH

Provide the following information for the key personnel in the order listed for Form Page 2.
Photocopy this page or follow this format for each person.

NAME		POSITION TITLE	
Galilei, Galileo		Professor of Medicine	
EDUCATION/TRAINING (Begin with baccalaureate or other initial professional education, such as nursing, and include postdoctoral training.)			
INSTITUTION AND LOCATION	DEGREE (if applicable)	YEAR(s)	FIELD OF STUDY
University of Northern Italy	BS	1959	Medicinal Chemistry
University of Pisa	MD	1963	Medicine

RESEARCH AND PROFESSIONAL EXPERIENCE: Concluding with present position, list, in chronological order, previous employment, experience, and honors. Include present membership on any Federal Government public advisory committee. List, in chronological order, the titles, all authors, and complete references to all publications during the past three years and to representative earlier publications pertinent to this application. If the list of publications in the last three years exceeds two pages, select the most pertinent publications. **DO NOT EXCEED TWO PAGES.**

Experience:

1963-1965: University of California, Los Angeles. Department: Medicine. Resident.
1965-1974: University of California, Los Angeles. Department: Medicine. Medical Resident.
1974-1979: University of California, Los Angeles. Department: Medicine. Chief Resident.
1979-1992: University of California, San Diego. Department: Medicine. Associate Professor of Medicine.
1992-1997: University of Bethesda. Department: Medicine. Professor of Medicine.

Honors:

Years: 1994-1995 JM Osbourne Preventive Medicine Award
Years: 1995-1996 American Society for Immunology Travel Award

Memberships:

Federal Advisory Committee Membership.
Agency: NIDDK Title: GMA-2 Study Section Start Year: 01/01/93 End Year: 01/01/1997

Publications:

- Galilei, G., Brown C (1997). The pathogenesis of coronary disease. New England Journal of Medicine, 236: 142-150.
- Galilei, G., Robin, C. (1995). Triggering of plaque disruption. Circulation, 81: 576-584.
- Galilei, G., Dilbert D. (1995) Arterial imaging and atherosclerosis reversal. Arterioscler Thromb. 14: 77-92.

Newton, I., Greenjeans, M. (1996) Effects of colestipol-niacin therapy on atherosclerosis. Circulation. 38:138-47.

Other Support

GALILEI, G.ACTIVE

2 R01 HL 00000-13 (Galilei)	3/1/96 - 2/28/99	30%
NIH/NHLBI	\$186,529	
Chloride and Sodium Transport in Airway Epithelial Cells		

The major goals of this project are to define the biochemistry of chloride and sodium transport in airway epithelial cells and clone the gene(s) involved in transport.

PENDING

DCB 950000 (Galilei)	12/01/98-11/30-00	20%
National Science Foundation	\$82,163	
Liposome Membrane Composition and Function		

The major goals of this project are to define biochemical properties of liposome membrane components and maximize liposome uptake into cells.

OVERLAP

There is scientific overlap between aim 2 of NSF DCB 950000 and aim 4 of the application under consideration. If both are funded, the budgets will be adjusted appropriately in conjunction with agency staff.

COPERNICUS, N.NONE**NEWTON, I.**ACTIVE

Investigator Award (Newton)	9/1/97 - 8/31/01	70%
Howard Hughes Medical Center	\$581,317	
Gene Cloning and Targeting for Neurological Disease Genes		

This award supports the PI's program to map and clone the gene(s) implicated in the development of Alzheimer's disease and to target expression of the cloned gene(s) to relevant cells.

OVERLAP

None

RESOURCES

FACILITIES: Specify the facilities to be used for the conduct of the proposed research. Indicate the performance sites and describe capabilities, pertinent capabilities, relative proximity, and extent of availability to the project. Under "Other," identify support services such as machine shop, electronics shop, and specify the extent to which they will be available to the project. Use continuation pages if necessary.

Laboratory: X

These studies will be performed in the laboratory of Dr. Galilei. Dr. Galilei's laboratory is located in the Clinical Research Center of the University of Bethesda. The laboratory contains sinks, benches, refrigerators, and freezers for in vitro studies.

Clinical: X

There is full access to patients at the Pharmacology Research Laboratory in Bethesda, MD. In addition, there is support of community physicians.

Animal: X

There are animal housing and procedure rooms in the Clinical Research Center. This facility is staffed by veterinarians and animal husbandry personnel.

Computer: X

Dr. Galilei's laboratory contains a network of Pentium PCs with two color laser printers. The network has direct access to the Internet via the University of Bethesda backbone.

Office: X

There are several offices adjacent to Dr. Galilei's laboratory with desks, bookshelves, filing cabinets and computer systems. These can be used by both investigators and administrative personnel.

Other:

N/A

MAJOR EQUIPMENT: List the most important equipment items already available for this project, noting the location and pertinent capabilities of each.

The Clinical Research Center contains the following:

Liquid scintillation counter, ultracentrifuge, refrigerated centrifuge, CO₂ incubator, radioisotope detector, microscopes, balances, and a digital imaging system with computer control and perfusion equipment.

CHECKLIST

TYPE OF APPLICATIONS (Check all that apply.)

☐ NEW application. (This application is being submitted to the PHS for the first time.)

☐ REVISION of application number: _____
(This application replaces a prior unfunded version of a new, competing continuation, or supplemental application.)

X COMPETING CONTINUATION of grant number: 1 R01 AI00000-01A1
(This application is to extent a funded grant beyond its current project period.)

INVENTIONS AND PATENTS (Competing continuation appl. only)

☐ No ☒ Yes. If "Yes," ☒ Previously reported
☐ Not previously reported

☐ SUPPLEMENT to grant number: _____
(This application is for additional funds to supplement a currently funded grant.)

X CHANGE of principal investigator/program director.

Name of former principal investigator/program director: Berhard Schmidt

☐ FOREIGN application or significant foreign component.

1. ASSURANCES/CERTIFICATIONS

The following assurances/certifications are made and verified by the signature of the Official Signing for Application Organization on the Face Page of the application. Descriptions of individual assurances/certifications begin on page 27 of Section III. If unable to certify compliance where application, provide and explanation and place it after this page.

•Human Subjects; •Vertebrate Animals; •Debarment and Suspension; •Drug- Free Workplace (application to new [Type 1] or revised [Type 1] applications only); •Lobbying; •Delinquent Federal Debt; •Research Misconduct; •Civil Rights (Form HHS 441 or HHS 690); •Handicapped Individuals (Form HHS 641 or HHS 690); •Sex Discrimination (Form HHS 639-A or HHS 690); •Age Discrimination (Form HHS 680 or HHS 690); •Financial Conflict of Interest.

2. PROGRAM INCOME (See instructions, page 20.)

All applications must indicate whether program income is anticipated during the period(s) for which grant support is request. If program income is anticipated, use the format below to reflect the amount and source(s).

Budget Period	Anticipated Amount	Source(s)
04/01/98-03/31/99	\$50,000	Howard Hughes Medical Center

3. INDIRECT COSTS

Indicate the applicant organization's most recent indirect cost rate established with the appropriate DHHS Regional Office, or, in the case of for profit organizations, the rate established with the appropriate PHS Agency Cost Advisory Office. If the applicant organization is in the process of initially developing or renegotiating a rate, or has established a rate with another Federal agency, it should, immediately upon notification that an award will be made, develop a tentative indirect cost rate proposal. This is to be based on

its most recently completed fiscal year in accordance with the principles set forth in the pertinent DHHS Guide for Establishing Indirect Cost Rates, and submitted to the appropriate DHHS Regional Office or PHS Agency Cost Advisory Office. Indirect costs will **not** be paid on foreign grants, construction grants, grants to Federal organizations, grants to individuals, and conference grants. Follow any additional instructions provided for Research Career Awards, Institutional National Research Service Awards, and specialized grant applications.

X DHHS Agreement dated: 01/01/98 ☐ No Indirect Costs Requested.

☐ DHHS Agreement begin negotiated with _____ Regional Office.

☐ No DHHS Agreement, but rate established with _____ Date _____

CALCULATION* (The entire grant application, including the Checklist, will be reproduced and provided to peer reviewers as confidential information. Supplying the following information on indirect costs is optional for forprofit organizations.)

a. Initial budget period: Amount of base \$ 470,757 x Rate applied 51.50 % = Indirect costs (1) \$ 242,439

b. Entire proposed project period: Amount of base \$ 1,098,404 x Rate applied 51.50 % = Indirect costs (2) \$ 565,678

(1) Add to total direct costs from form page 4 and enter new total on Face Page, Item 7b.

(2) Add to total direct costs from form page 5 and enter new total on Face Page, Item 8b.

*Check appropriate box(es):

☐ Salary and wages base ☒ Modified total direct cost base ☐ Other base (Explain)

☐ Off-site, other special rate, or more than one rate involved (Explain)

Explanation (Attach separate sheet, if necessary.):

4. SMOKE-FREE WORKPLACE

Does your organization currently provide a smoke-free workplace and/or promote the nonuse of tobacco products or have plans to do so?

X Yes ☐ No (The response to this question has no impact on the review or funding of this application.)

All Personnel for the Current Budget Period

PHS 398 (REV. 4/98)

Place this form at the end of the signed original copy of the application. Do not duplicate.

Social Security No. 123-45-6789

PERSONAL DATA ON PRINCIPAL INVESTIGATOR/PROGRAM DIRECTOR

The Public Health Service has a continuing commitment to monitor the operation of its review and award processes to detect—and deal appropriately with—any instances of real or apparent inequities with respect to age, sex, race, or ethnicity of the proposed principal investigator/program director.

To provide the PHS with the information it needs for this important task, complete the form below and attach it to the signed original of the application after the Checklist. **Do not attach copies of this form to the duplicated copies of the application.**

Upon receipt of the application by the PHS, this form will be separated from the application. This form will **not** be duplicated, and it will **not** be a part of the review process. Data will be confidential, and will be maintained in Privacy Act record system 09-25-0036, "Grants: IMPAC (Grant/Contract Information)." All analyses conducted on the data will report aggregate statistical findings only and will not identify individuals.

If you decline to provide this information, it will in no way affect consideration of your application.

Your cooperation will be appreciated.

DATE OF BIRTH (MM/DD/YY)

03/03/38

GENDER

☐

Female

☒

Male

RACE AND/OR ETHNIC ORIGIN (check one)

Note: The category that most closely reflects the individual's recognition in the community should be used when reporting mixed racial and/or ethnic origins.

☐

American Indian or Alaskan Native. A person having origins in any of the original peoples of North America, and who maintains a cultural identification through tribal affiliation or community recognition

☐

Asian or Pacific Islander. A person having origins in any of the original peoples of the Far East, Southeast Asia, the Indian subcontinent, or the Pacific Islands. This area includes, for example, China, India, Japan, Korea, the Philippine Islands, and Samoa.

☐

Black, not of Hispanic origin. A person having origins in any of the black racial groups of Africa.

☐

Hispanic. A person of Mexican, Puerto Rican, Cuban, Central or South American, or other Spanish culture or origin.

☐

White, not of Hispanic origin. A person having origins in any of the original peoples of Europe, North Africa, or the Middle East.

☒

Check here if you do not wish to provide some or all of the above information

Inclusion Report Format For Each Study

Initially: Provide the number of subjects proposed for the study according to the following categories. If there is more than one study, provide a separate table for each study. In addition, report on the subpopulations that are proposed to be included in the study.

Annually: Provide the number of subjects enrolled in the study to date, according to the following categories. If there is more than one study, provide a separate table for each study. In addition, report on the subpopulations that are proposed to be included in the study.

Gender and Minority Inclusion

Study Title:

	American Indian or Alaskan Native	Asian or Pacific Islander	Black, not of Hispanic Origin	Hispanic	White, not of Hispanic Origin	Other or Unknown	Total
